

Cloverdale Sanitary District Needs Your Help!

Cloverdale Sanitary District is exploring the most cost-effective way to fund critical improvements for our aging wastewater treatment plant to protect water quality and improve system reliability.

Household income data is used to determine eligibility for key funding programs. Because Census data may not accurately reflect incomes in our small, unincorporated community, this **confidential** survey is needed to document local conditions. The Rural Community Assistance Corporation (RCAC) is authorized as the survey coordinator for this confidential income survey.

How Can You Help Your Community?

Your participation is important. Please complete the income survey either online or by filling out the enclosed paper form and returning it in the postage-paid envelope provided.

A high response rate is needed for the survey results to be valid.

\$5 credit! Each household that submits a **complete** questionnaire will receive **\$5 credit** from CSD toward its wastewater bill.

Please watch your mail over the next few months.
The survey may look like junk mail, please do not throw it away!
